

# QlikView

## Professional Layout Training

### Course Outline

This course is targeted at helping power-users to get the most out of QlikView's powerful personalisation features. Beyond building a solid understanding of the QlikView products, the primary focus of this session is on creating and modifying graphs, charts, tables and other application interface customisations.

Topics Include:

- Introduction to QlikView
- Analysing data in QlikView
- Basic changes to the layout
- General object settings
- Table & multi boxes
- Charts
- Multidimensional charts & pivot tables
- Reports
- Buttons
- Text and line objects
- Other objects
- Use of calculated formulas
- Saving the layout
- Images & Aesthetics
- Default settings
